Git [Github, Gitlab, Bitbucket]

NoSql databases [Redis]

Project management and team workspace tools [Jira, Trello, Basecamp]

Containerization [Docker]

Familiar to [Pimcore]

Shopware 6

Figma

Work Experience

FullStack Developer Shapeandshift [2021]

I worked with an international professional team in the ShapeAndShift company. Generally, I worked on Shopware and Laravel.

There I worked with various web technologies such as:

- Shopware
- Symfony
- Vue
- Laravel

PHP Developer AK Software [2019 -2021]

Ak Software was an agency that got projects. We always had new challenges. And almost every few weeks, we were working on a new project.

- Shopware
- Pimcore
- Symfony
- Vue

FullStack Developer ARKA battety [2018 -2019]

At ARKA Battery Company, I worked for an online shopping store that sold car batteries. This website is one of the most famous shops for selling car batteries online in Iran. I have implemented this website with Symfony 4

- Symfony 4
- JQuery
- Javascript
- Bootstrap

FullStack Developer Adak fanavari mania [2016 – 2018]

At Adak, I worked on a shopping website selling network hardware. Also, we had a CRM in there. CRM had features that were used to manage employee audits and receipts

1. Designed SQL queries for users, involving multiple tables and both inner/outer joins.

Using MySQL

2. workbench to reverse-engineer the database to look at the tables and relationships

3. Wrote model/controller classes/functions, designed SQL statements that go into the model functions.

Projects

<https://github.com/ChristopherDosit/Shopware-6-Blog-Plugin>

I cooperated in the GitHub repository. this is related to Blog plugin in the Shopware 6.

<https://sensorox.de/>

Designing and implementing a theme plugin Shopware according to customer require

<https://github.com/pedramham/shopware-form-plugin-upload-pdf>

Shopware 6.5 Plugin form with pdf file upload

<https://store.shopware.com/en/xxx4658490784021/delivery-by-appointment.html>

Shopware extension plugin

<https://www.sabarico.com>

Technologies: Symfony 4.3, Amp-html, MySQL, Redis

<https://www.arkabattery.com>

Arka Battery is an online store for batteries. This store has a search engine and by entering the make of the car, the user can find and choose the most suitable battery for it.

During the shopping process, the user will be informed of the payment process through SMS, and they will receive an invoice at the end.

All the items the shop's manager needs are at the Admkn Panel. Items such as:

warehouse info, accounting, wage payment info and various other statistical information.

Technologies: Symfony, jquery, Bootstrap, Soap etc...

<https://www.avicenna-ac1.com/>

Web application for publisher

Technologies: Symfony 4.3, MySQL, JQuery, Ajax, Bootstrap 4

<http://mania-co.com>

Web application for company Adak Fanavari mania

Technologies: PHP, MySQL, Bootstrap
